## Description

Detcon Model DM-700-CO Carbon Monoxide sensors are non-intrusive "Smart" sensors designed to detect and monitor CO in air over the range of 0-100 ppm. The sensor assembly is constructed of electropolished 316SS and consists of two parts – an encapsulated universal Intelligent Transmitter Module (ITM), and a plug-in electrochemical cell with intelligent sensor interface. The plug-in intelligent sensor automatically identifies itself to the ITM and allows for seamless field interchangeability. Operator interface is via a small handheld magnet. One of the main features is the embedded intuitive software that guides the user through routine calibration and configuration menus using a built-in LED alpha/numeric display. Included is a splashguard with integral cal port.
