Description
Detcon Model CXT-DM-SO2 SmartWireless® sulfur dioxide gas detection sensors are easily and economically deployable in both permanent and temporary installations. These low power sensors assemblies utilize electrochemical technology for a long list of toxic gases. All component parts are rated for Class 1; Division 1, Group C, D hazardous areas. These advanced field devices consist of a Detcon Model Series CXT low power gas detection sensor, and wireless transceiver packaged in a single enclosure. Power is provided by an internal battery pack with disposable “C” cell (3.6V) batteries capable of continuous operation for greater than 60 days. An optional lithium ion rechargeable battery pack allows for 5 months operation. Solar power options allow for indefinite operation. An optional battery pack with disposable “D” cell (3.6V) batteries is capable of delivering up to 9 months operation.

Detcon’s proprietary “Self Healing Mesh” technology operates at 2.4 GHZ and conforms to non licensed radio frequency appliance usage around the world. Wireless network integrity and security is accomplished using direct sequence spread spectrum DSSS programming topology. Wireless applications can be as simple as a single field device communicating with a host display or any number of field devices forming a network of subscribers. Each device in the network is assigned its unique device identification or a UID. Every device in the network can act as a router and repeater for all other devices in the network. This means that subscribers can “hop” through neighboring devices to communicate with each other thereby widening network access points. This unique and innovative technology is designed to create a robust network that automatically routes around congestion and line-of-sight obstacles while improving throughput as subscriber device density increases.

Standard network configuration is of the master/slave mesh type (320 Transceiver). An optional and proprietary technology referred to as “Fault Tolerant Safety Network” (300 Transceiver) is also available which guarantees that no single point of failure will interrupt communications between devices on the rest of the network, including loss of HMI. Processing power is, in a sense, shared among all devices. There is no controller dependence. Each device in the network is capable of acting as the network master, processing real time data and issuing commands to other devices in the network.

Features
- Detcon self healing mesh network topology
- Universally accepted 2.4 GHz non-licensed frequency
- Low power gas detection sensors with built-in transceivers
- Built-in display for gas sensor/field device HMI
- Disposable battery packs

Applications
- Oil and Gas Drilling Rigs
- Work-over and pulling units
- Oil and Gas Production
- Turn-a-rounds in Refining and Petrochemical Plants
**SmartWireless® ▪ Model Series CXT-DM-SO2 Sulfur Dioxide Gas Detection Sensor**

**System Specifications**

**Sensor Type**
- Continuous diffusion/adsorption
- 3-electrode electrochemical cell
- Plug-in field replaceable

**Measurement Range**
- 0-20 ppm, Other ranges available

**Accuracy/Repeatability**
- ±2% FS

**Response/Clearing Time**
- T90 ≤20 seconds

**Span Drift**
- <2% signal loss per month

**Input/Output**
- 2.4GHz DSSS Radio Transmission

**Safety Approvals**
- Explosion proof
  - cCSAus Class I, Division 1, Groups C, D (Tamb = -40°C to +60°C)
  - Class I, Zone 1, Group IIB
- ATEX Ex d ib IIB T4 Gb (Tamb = -40°C to +50°C)

**Ingress Protection**
- NEMA 4X

**Order Guide**

<table>

<td>96C-550_0_-020</td>
<td>Model CXT-DM-SO2, 20 PPM Sulfur Dioxide</td>
</tr>
</tbody>
</table>

To complete the part number please select from the options below. X X X - X X X _ X _ _:

- Position “9” select SmartWireless® Transceiver Option
  - 0 - CXT-DM with 300 fault tolerant transceiver
  - 2 - CXT-DM with 320 mesh transceiver

**Electrical Specifications**

**Power Input**
- 9-30 VDC and/or
- Internal Battery Pack with “C” Size (3.6V) disposable batteries
- Optional internal Battery Pack with “D” Size (3.6V) disposable batteries
- Optional Lithium Ion Rechargeable Battery Pack

**Power Consumption**
- 20mW (Low Power Mode); 100mW (typical); 500mW (max)

**RF**
- Outdoor RF Line of Sight (with standard antenna): 1.5 miles
- Interface Data Rate: 9,600bps
- Throughput Data Rate: 19,200bps
- RF Data Rate: 250,000bps
- Transceiver Sensitivity: -102dBm
- Frequency: 2.40-2.48GHz
- RF Channels: 16, each 5Mz wide
- Output Power: 100mW (20.5dBm) EIRP
- Spread Spectrum: DSSS (Direct Sequence Spread Spectrum)
- Modulation: 0-QPSK
- Supported Network Topologies: Mesh, Point-to-Point

**Antenna**
- 5db flex whip; Screw on radome whip antenna guard included

**I/O Protection**
- Over-voltage, Miswiring, EMI/RFI Immunity

**Status Indicators**
- 4-digit LED display with gas concentration
- Full-script menu prompts for Auto Zero/AutoSpan, & Fault Reporting

**Faults Monitored**
- Span, Memory, Processor, Clearing, Range, Zero, Sensor Fault 1, Sensor Fault 2

**Environmental Specifications**

**Operating Temperature Range**
- (sensor); see battery temp specs below
- -4°F to +122°F; -20°C to +50°C

**Storage Temperature Range**
- -31°F to +131°F; -35°C to +55°C (typical)

**Operating Humidity Range**
- 15% to 90% RH non-condensing

**Operating Pressure Range**
- Atmospheric ±10%

**Battery Specifications**

**Battery Pack with Disposable “C” Cells (3.6V):** 2 months sensor run time full function
- (-55°C to +85°C; -67°F to +185°F discharge temperature).

**Battery Pack with Disposable "D" Cells (3.6V):** 9 months sensor run time full function
- (-55°C to +85°C; -67°F to +185°F discharge temperature).

**Smart Lithium Ion Rechargeable Battery:** 5 months sensor run time full function
- (-20°C to +60°C, -4°F to +140°F discharge temperature; -30°C intermittent).
